## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yasuo, US 5,014,909.In considering claims 1,

Yasuo discloses a television 3 which includes a screen as shown (Fig 4), which includes a body, as well as a body of the container case 5, wherein the case forms an outer appearance and supports a bottom of the screen as shown, wherein the case also includes a drain hole 4, which discharges moisture from the dehumidifier in the case and the TV/screen.

1b. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bortolotto, EP-700209 (Derwent 1996-131131).

In considering claim 1,

Bortolotto discloses a TV cabinet (10) integrated into a modular furniture structure (12), to enclose CRT 19, wherein the structure includes holes or grilles (17,18,25,26) to communicate with the atmosphere (thus discharging moisture).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3 and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA (Applicant's Admitted Prior Art (Figs 5-6).

In considering claim 1,

As disclosed by applicant, AAPA (Figs 5-6) discloses the claimed screen, the claimed body, the claimed supporting.

However, AAPA does not explicitly recite the use of a drain hole.

Since the use of a drain hole at the bottom (or multiple positions) is well known in the art the examiner will take "OFFICIAL NOTICE" regarding such, since the use of holes for reducing/removing moisture in such an apparatus has been previously done. In the event the applicant wishes to traverse such notice, the examiner notes the above cited references, Yasuo and Bortolotto.

In considering claims 2-3 and 5-6,

AAPA (Figs 5-6) disclose the claimed insertion groove 110 which includes first/second insertion grooves (Fig 6, 111, 112) which are formed a different levels.

Regarding the limitation "to discharge moisture", since the Prior Art is situated in the same position as claimed, the intended use/different purpose for a same device is not a patentable feature.

Application/Control Number: 10/820,749 Page 4

Art Unit: 2622

AAPA also discloses the lenticular lens on the front and the fresnel sheet on a rear of the

screen.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure—see newly cited references on attached form PTO-892.

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Brian Yenke whose telephone number is (571)272-7359. The

examiner work schedule is Monday-Thursday, 0730-1830 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

Supervisor, David L. Ometz, can be reached at (571)272-7593.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(571)-273-8300

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the Technology Center 2600 Customer Service Office whose

telephone number is

(703)305-HELP.

Application/Control Number: 10/820,749

Art Unit: 2622

General information about patents, trademarks, products and services offered by the United States Patent and Trademark Office (USPTO), and other related information is available by contacting the USPTO's General Information Services Division at:

800-PTO-9199 or 703-308-HELP

(FAX) 703-305-7786

(TDD) 703-305-7785

An automated message system is available 7 days a week, 24 hours a day providing informational responses to frequently asked questions and the ability to order certain documents. Customer service representatives are available to answer questions, send materials or connect customers with other offices of the USPTO from 8:30 a.m. - 8:00p.m. EST/EDT, Monday-Friday excluding federal holidays.

For other technical patent information needs, the Patent Assistance Center can be reached through customer service representatives at the above numbers, Monday through Friday (except federal holidays) from 8:30 a.m. to 5:00 p.m. EST/EDT.

The Patent Electronic Business Center (EBC) allows USPTO customers to retrieve data, check the status of pending actions, and submit information and applications. The tools currently available in the Patent EBC are Patent Application Information Retrieval (PAIR) and the Electronic Filing System (EFS).

PAIR (http://pair.uspto.gov) provides customers direct secure access to their own patent application status information, as well as to general patent information publicly available.

EFS allows customers to electronically file patent application documents securely via the Internet. EFS is a system for submitting new utility patent applications and pre-grant

Application/Control Number: 10/820,749

Art Unit: 2622

publication submissions in electronic publication-ready form. EFS includes software to help customers prepare submissions in extensible Markup Language (XML) format and to assemble the various parts of the application as an electronic submission package. EFS also allows the submission of Computer Readable Format (CRF) sequence listings for

pending biotechnology patent applications, which were filed in paper form.
